

PATAGOTITAN MAYORUM

Systematic	Titanosauria-Lognkosauria
Site and province	La Flecha Ranch, Chubut
Formation	Cerro Barcino
Age	Lower Cretaceous (Albian)
Material	An anterior, two middle cervical vertebrae, seven dorsal vertebrae, six anterior caudal vertebrae, sternal plates, scapulocoracoid, pubes, and femora.
Environment	Fluvial floodplain
Authors	Carballido et al. (2017)
Notes	The name includes <i>Patago-</i> from Patagonia (southern South America) and <i>-titan</i> (Greek divinity, a symbol of strength and large size). The species name honors the Mayo family for their hospitality during fieldwork at the La Flecha Ranch. The taxon is represented by at least six individuals found in the same quarry, distributed in three distinct but close horizons corresponding to three different burial events.
